Issue date 17-August-2021 4291-18 (Canada/US GHS)

1-5\*

106-97-8

Chemical name	Common name and synonyms	CAS number	%
Monoethanolamine		141-43-5	1-5*
Propane		74-98-6	1-5*
Sodium hydroxide		1310-73-2	5-10*
All concentrations are in percent by	y weight unless ingredient is a gas. Gas concen	ntrations are in percent by vo	ume.
Composition comments	US GHS: The exact percentage (concentration secret in accordance with paragraph (i) of §19 *CANADA GHS: The exact percentage (concentrate secret.	910.1200.	
	4. First Aid Measures		
Inhalation	IF INHALED: Remove person to fresh air and POISON CENTER/doctor.	keep comfortable for breath	ing. Immediately call a
Skin contact	IF ON SKIN (or hair): Take off immediately all contaminated clothing before reuse.	contaminated clothing. Rins	e skin with water. Wash
Eye contact	IF IN EYES: Rinse cautiously with water for se and easy to do. Continue rinsing. Immediately		
Ingestion	IF SWALLOWED: Rinse mouth. Do NOT indu CENTER/doctor.	ice vomiting. Immediately cal	l a POISON
Most important symptoms/effects, acute and delayed	Burning pain and severe corrosive skin dama include stinging, tearing, redness, swelling, ar blindness could result.		
Indication of immediate medical attention and special treatment needed	Provide general supportive measures and trease Symptoms may be delayed.	at symptomatically. Keep vic	tim under observation.
General information	Ensure that medical personnel are aware of the protect themselves. Avoid contact with eyes a goggles. Keep out of reach of children. Do no or incinerate container.	and skin. Wear rubber gloves	and chemical splash
	5. Fire Fighting Measure	es	
Suitable extinguishing media	Dry chemical. Carbon dioxide. Fog.		
Unsuitable extinguishing media	None known.		
Specific hazards arising from the chemical	Contents under pressure. Pressurized contair	ner may explode when expos	ed to heat or flame.
Special protective equipment and precautions for firefighters	Firefighters must use standard protective equ face shield, gloves, rubber boots, and in enclo		lant coat, helmet with
Fire-fighting equipment/instructions	Move containers from fire area if you can do s containers. Containers should be cooled with massive fire in cargo area, use unmanned hos withdraw and let fire burn out.	water to prevent vapor press	sure build up. For
Specific methods	Use standard firefighting procedures and cons containers from fire area if you can do so with water until well after the fire is out. In the ever	out risk. Cool containers exp	osed to flames with
General fire hazards	Pressurized container may explode when exp	•	
Hazardous combustion products	May include and are not limited to: Oxides of	nitrogen. Oxides of carbon.	
	6. Accidental Release Meas	sures	
Personal precautions, protective equipment and emergency procedures	Keep unnecessary personnel away. Keep out spill/leak. Wear appropriate protective equipm damaged containers or spilled material unless closed spaces before entering them. Local au cannot be contained. For personal protection,	nent and clothing during clear s wearing appropriate protect ithorities should be advised if	n-up. Do not touch ive clothing. Ventilate
Methods and materials for containment and cleaning up	Refer to attached safety data sheets and/or in smoking, flares, sparks, or flames in immedia away from spilled material. Stop leak if you ca open area if the leak is irreparable. Isolate are later disposal. Absorb spillage to prevent mate or other appropriate container. Prevent entry in Following product recovery, flush area with wa	nstructions for use. Eliminate te area). Keep combustibles an do so without risk. Move th ea until gas has dispersed. D erial damage. Scoop up used into waterways, sewer, base	(wood, paper, oil, etc.) ne cylinder to a safe and ike far ahead of spill for absorbent into drums ments or confined areas
Environmental precautions	Avoid discharge into drains, water courses or	onto the ground.	

7. Handling and Storage	
Precautions for safe handling	Do not handle, store or open near an open flame, sources of heat or sources of ignition. Protect material from direct sunlight. Pressurized container: Do not pierce or burn, even after use. Do not use if spray button is missing or defective. Do not spray on a naked flame or any other incandescent material. Do not smoke while using or until sprayed surface is thoroughly dry. Do not cut, weld, solder, drill, grind, or expose containers to heat, flame, sparks, or other sources of ignition. Avoid contact with eyes, skin and clothing. Avoid prolonged exposure. Use only in well-ventilated areas. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.
Conditions for safe storage, including any incompatibilities	Store locked up. Pressurized container. Protect from sunlight and do not expose to temperatures exceeding 50°C/122 °F. Do not puncture, incinerate or crush. Do not handle or store near an open flame, heat or other sources of ignition. Keep away from heat, sparks and open flame. Avoid exposure to long periods of sunlight. Store in a corrosion resistant container with a resistant inner liner. Store away from incompatible materials (see Section 10 of the SDS). Keep out of the reach of children.
	8. Exposure Controls/Personal Protection

### Occupational exposure limits

Canada. Alberta OELs (Occupational Health & Safety Code, Schedule 1, Table 2)			
Components	Туре	Value	
Butane (CAS 106-97-8)	TWA	1000 ppm	
Monoethanolamine (CAS 141-43-5)	STEL	15 mg/m3	
		6 ppm	
	TWA	7.5 mg/m3	
		3 ppm	
Propane (CAS 74-98-6)	TWA	1000 ppm	
Sodium hydroxide (CAS 1310-73-2)	Ceiling	2 mg/m3	

# Canada. British Columbia OELs. (Occupational Exposure Limits for Chemical Substances, Occupational Health and Safety Regulation 296/97, as amended)

Components	Туре	Value	
Butane (CAS 106-97-8)	STEL	750 ppm	
	TWA	600 ppm

Ventilation rates pplicable, use process enclosures, local exhaust ventilation tain airborne levels below recommended exposure limits. ished, maintain airborne levels to an acceptable level. ent
ropriate engineering trols vidual protection measures Eye/face protection	Good general ventilation (typically 10 should be matched to conditions. If a or other engineering controls to main exposure limits have not been establ , such as personal protective equipm	air changes per hour) should be used. Ventilation rates pplicable, use process enclosures, local exhaust ventilation tain airborne levels below recommended exposure limits. ished, maintain airborne levels to an acceptable level. ent s (or goggles).

Respiratory protection	Where exposure guideline levels may be exceeded, use an approved NIOSH respirator. Respirator should be selected by and used under the direction of a trained health and safety professional following requirements found in OSHA's respirator standard (29 CFR 1910.134), CAN/CSA-Z94.4 and ANSI's standard for respiratory protection (Z88.2).
Thermal hazards	Not applicable.
General hygiene considerations	When using do not smoke. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

	9. Physical and Chemical Properties		
Appearance	Compressed liquefied gas.		
Physical state	Gas.		
Form	Aerosol. Spray		
Color	Clear Green		
Odor	Caustic		
Odor threshold	Not available.		
рН	$13.0 \pm 0.5$		
Melting point/freezing point	Not available.		
Initial boiling point and boiling range	Not available.		
Pour point	Not available.		
Specific gravity	Not available		
Partition coefficient (n-octanol/water)	Not available.		
Flash point	Not available		
Evaporation rate	< 1 (Ether = 1)		
Flammability (solid, gas)	Not applicable.		
Upper/lower flammability or exp	losive limits		
Flammability limit - lower (%)	Not available		
Flammability limit - upper (%)	Not available		
Explosive limit - lower (%)	Not available.		
Explosive limit - upper (%)	Not available.		
Vapor pressure	481 kPa		
Vapor density	Not available.		
Relative density	Not available.		
Solubility(ies)	Not available.		
Auto-ignition temperature	Not available		
Decomposition temperature	Not available.		
Viscosity	Not available.		
Other information			
Heat of combustion	3.23 kJ/g		
10. Stability and Reactivity			
Reactivity	Strong acids.		

Reactivity	Strong acids.
Possibility of hazardous reactions	No dangerous reaction known under conditions of normal use.
Chemical stability	Material is stable under normal conditions.
Conditions to avoid	Do not mix with other chemicals.
Incompatible materials	Strong oxidizing agents. Acids. Reducing agents. Soft metals.
Hazardous decomposition products	May include and are not limited to: Oxides of carbon. Oxides of nitrogen.

### 11. Toxicological Information

Routes of exposure

Inhalation. Ingestion. Skin contact. Eye contact.

### Information on likely routes of exposure

Ingestion	Causes digestive tract burns.
Inhalation	Prolonged inhalation may be harmful.
Skin contact	Causes severe skin burns.
Eye contact	Causes serious eye damage.
Symptoms related to the physical, chemical and toxicological characteristics	Burning pain and severe corrosive skin damage. Causes serious eye damage. Permanent eye damage including blindness could result. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.

Teratogenicity Not available. Specific target organ toxicity -Not classified. single exposure Specific target organ toxicity -Not classified. repeated exposure Aspiration hazard Not likely, due to the form of the product. **Chronic effects** Prolonged inhalation may be harmful. May be harmful if absorbed through skin.

### 12. Ecological Information

Ecotoxicity	See below		
Ecotoxicological data Components		Species	Test Results
Monoethanolamine (CAS 141-43-	5)		
Algae	IC50	Algae	15 mg/L, 72 Hours
Crustacea	EC50	Daphnia	65 mg/L, 48 Hours
Aquatic			
Fish	LC50	Rainbow trout,donaldson trout (Oncorhynchus mykiss)	114 - 196 mg/L, 96 hours
Sodium hydroxide (CAS 1310-73-	-2)		
Aquatic			
Crustacea	EC50	Water flea (Ceriodaphnia dubia)	34.59 - 47.13 mg/L, 48 hours
Fish	LC50	Western mosquitofish (Gambusia affinis)	125 mg/L, 96 hours
Persistence and degradability	No data is ava	ailable on the degradability of this product.	
Bioaccumulative potential	No data availa	able.	
Mobility in soil	No data availa	able.	
Mobility in general	Not available.		
Other adverse effects		erse environmental effects (e.g. ozone deplocrine disruption, global warming potential)	
	1	3. Disposal Considerations	
Disposal instructions	Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Contents under pressure. Do not puncture, incinerate or crush. This material and its container must be disposed of as hazardous waste. Incinerate the material under controlled conditions in an approved incinerator. Do not allow this material to drain into sewers/water supplies. Do not contaminate ponds, waterways or ditches with chemical or used container. Dispose of		
Local disposal regulations	contents/container in accordance with local/regional/national/international regulations. Dispose in accordance with all applicable regulations.		
Hazardous waste code	D002: Waste Corrosive material [pH <=2 or =>12.5, or corrosive to steel] The waste code should be assigned in discussion between the user, the producer and the waste disposal company.		
Waste from residues / unused products	Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).		
Contaminated packaging	Since emptied	ners should be taken to an approved waste d containers may retain product residue, fo not re-use empty containers.	
		14. Transport Information	
Transport of Dangerous Goods (TDG) Proof of Classification	Classification Method: Classified as per Part 2, Sections 2.1 – 2.8 of the Transportation of Dangerous Goods Regulations. If applicable, the technical name and the classification of the product will appear below.
